

Herbal Tea or Emergency Room?

Dear friends,

From time to time, one of our customers has an exceptional healing result, and it's so inspirational, I have to share it with everyone!

About 2 months ago, a friend of mine called me saying he was getting ready to leave his apartment to go to the Emergency room because he was in agonizing pain. I told him, "Wait just a second! You just got out of the hospital a month ago, and the bill was \$53,000. Let's think twice about this. Maybe this is something I can help with the herbs. Tell me, what are your symptoms?"

After thorough questioning, he came out with the following symptoms:

Severe pain in the region of the ribcage on the right hand side. The pain would come and go, each time building in intensity up to a peak and then gradually subsiding, only to come back again.

I said, "This is the liver/gallbladder area, and it sounds like you have a gallstone that is stuck. A classic sign of a stuck gallstone is a pain that comes and goes in this particular area of the body. Are the symptoms worse when you eat?" He replied, "Yes, and I also have heartburn and suddenly I'm belching all the time."

When he said this, I knew right away he was suffering from acute gallstones, otherwise known as acute cholecystitis. I told him that the heartburn and frequent belching was due to the stone blocking the bile duct. The bile couldn't flow through the bile duct into his intestines to help digest his food when he ate. The conventional medical treatment for cholecystitis is to surgically remove the gallbladder. After I told my friend he was suffering from a classic presentation of gallstones, I asked him, "Do you want to have your gallbladder removed?"

He was very opposed to surgery and wanted to know what he could do naturally instead. It just so happened that I had [Stone Dissolve Tea](#) on hand. I told him exactly what to do to release the stone and he got to work on it. Unfortunately, it was late at night, and the only thing open was the convenience store.

Here's what he ended up doing: he bought some fresh apples (since I told him the malic acid helped to dissolve gallstones), bottled apple juice, and 2 cans of Classic Coke® (which I told him was not a good thing to drink daily, but he was only going to drink it for 2 days because the phosphoric acid contained in it helps dissolve the gallstones), and he already had olive oil on hand.

I asked him, "What is your pain level on a scale from 1 to 10?" He said, "10." Since it was past midnight, the only thing he felt up to doing was making the Stone Dissolve Tea. He was so tired, he didn't even add the apple juice, but swallowed one tablespoon of olive oil to lubricate his bile ducts. I had told him not to eat any solid food until this problem was gone.

The next morning he called me, saying he was feeling much better and that he was able to avoid going to the Emergency Room. I asked him what his pain level was, and he answered, "2." I said, "Really? Wow – that tea works great!" So, that day, I advised him to follow up the healing with another day of the Stone Dissolve Tea plus the Coca Cola®, the [L/GB Formula](#) and to use the [Lemon Essential Oil](#) massaged over his liver area as well as putting a couple of drops in a glass of water and drinking it a few times daily.

The next morning he called again, saying his pain was completely gone as well as all of his other symptoms. Since that time, he hasn't had any problems whatsoever with his gallbladder – and he never did make it into the Emergency Room. He said he wasn't even aware of passing the stone, it didn't hurt, and it was probably the easiest thing he had ever done to heal himself. He wanted to know why more people didn't know about this "gallstone purge" and the stone-dissolving herbs. I replied, "Not only do the stone-dissolving herbs help dissolve gallstones, but they're also a classic for dissolving kidney stones, helping heal chronic prostate troubles, chronic female reproductive issues as well as helping gout and arthritis by dissolving abnormal calcium deposits in the joints."

So now, I'm letting everyone how to save themselves from gallstone attacks. One package of the tea is usually enough for most gallstones, and perhaps more packages would be needed for exceptionally large gallstones. I can't tell you how many times I have had customers email me and tell me that after the surgeon removed their gallbladder, their health took a turn for the worse and they now have chronic digestive problems. This just doesn't have to happen!

Please educate yourself about the dangers of gallbladder removal here: [Dangers of Gallbladder](#)

Removal On this page, you'll also learn about the liver/gallbladder flush that everyone can do to flush out gallstones and cleanse the liver so that gallstone attacks like the one my friend had don't happen to you. I just don't want to hear another tear-jerker story about a gallbladder removal gone wrong when there is such a simple natural solution available. So, please save this email and print it out for your friends so that we can stop so many of these unnecessary surgeries from happening.

For those who don't know what herbs to take for their specific health issue, we now have a new **Ailment Reference Guide** online! This guide lists over 400 health complaints, and the specific herbs and/or formulas to take. Many people email or call in asking about herbs for their relatives' health problems. Now you can show them this indispensable guide to help them figure out what they need. I always find that if a relative is unsure about taking herbs, seeing it printed in black in white is a big step towards getting them to accept the fact that herbs can help.

New formulas are here!

Adrenal Support - an energizing and strengthening formula great for chronic fatigue sufferers as well as bodybuilders and athletes. This formula is naturally free of harsh stimulants that give quick energy, but then worsen fatigue in the long run. (Ephedra, ma huang, caffeine, theobromine, Mormon tea, guarana, sugar).

Sweet Relief Essential Oil blend - an essential oil blend that helps balance the blood sugar whether it's too low or too high. The inspiration came from using the essential oil of cypress on a diabetic who went into hypoglycemic seizures and I was able to pull him out of the seizures almost instantaneously with the essential oil.

Stone Dissolve Tea, a valuable aid for naturally dissolving gallstone, kidney stones, prostate stones, arthritis calcium deposits.

We're in stock now and ready to get these valuable herbs out to you so that you can have a wonderful shift in your health level.

Yours in health,
Cynthia Foster, MD
